Home Care Club (HCC) Member Details provided by Mahoney Plumbing (MPI):

1. Complete Membership details available online at www.MahoneyPlumbing.com/HCC.html
2. **Repair Warranty:** Warranty is increased from 30 to 90 days on repairs and sewer rodding and applies only to materials and labor provided by MPI as long as your membership is current throughout the warranty period. See below for exclusions.
3. **Installation Warranty:** Warranty increased from 1 year to 2 years on all new fixtures, faucets, water heaters, pumps, piping, heating and cooling systems, humidifiers, and electrical equipment provided and installed by MPI. Homeowner is required to follow the manufacturer's recommended maintenance schedule for this warranty to remain in effect. Exclusions are below.
4. **Service Scheduling:** As an HCC member we'll work hard to make scheduling as simple as possible. While we don't ever put a minor repair (for example, a dripping faucet) over an emergency (like water pouring through a ceiling) we do make every effort to schedule our HCC members to best meet their schedule.
5. **Service Estimate *:** HCC members can receive a free written estimate on repairs that can be diagnosed with a visual inspection, without the use of tools or equipment. The normal cost is at least \$59.00.
6. **Service Charge *:** We currently have a \$59.00 service charge to get our licensed, trained, uniformed, drug tested, background checked professional in a truck full of tools, parts and specialty equipment to your home. Once there we will perform a visual inspection of your problem and either quote a repair cost or a diagnostic cost to determine the problem. If you have us perform the quoted work, we will waive the service charge.
7. **After Hours Service Charge *:** Our technicians are always available for after-hours emergency work. Our current normal hours of operation are Monday through Friday from 7:00 am until 3:30 pm. Emergency work is defined as a sewer back-up, flood that cannot be stopped by temporarily turning off the water to the house, or no heat to a home that only has one furnace or boiler. While we waive our service charge if work is performed during normal business hours, the service charge is NOT waived after hours. Currently, HCC members pay a \$59.00 service charge compared to \$140.00 for non-HCC customers.
8. **Discounts on Standard Repairs.** As an HCC member, you will receive a savings of 10% off our regular prices. During normal business hours, you will be identified to our technician as an HCC Member before he is dispatched. Most of the services performed by MPI will be subject to upfront pricing. Once our technician has properly diagnosed the problem, you will be given a set price which includes all labor, materials, and equipment charges. Upfront pricing does not apply to certain services which can only be solved via trial and error, or complex jobs involving unknowns, or projects such as remodeling work. New construction and remodeling work is excluded.
9. **Service Reminders:** We understand your plumbing and HVAC systems aren't at the top of your mind and we don't want them to be. Our service reminders are designed to let you be in control of your house without having to add one more thing to your to-do list. All service reminders are delivered to you via email only.
10. **Annual Visual Inspection:** We will attempt to contact you via phone or email no more than 3 times to set up a free annual visual inspection (performed without the use of tools or equipment) of your plumbing and HVAC to be performed in March, April, or August only. If the customer cannot have the free inspection performed in one of these three months, we will be unable to perform the inspection. As the inspection is free, it has no credit value if not performed. If we find a problem during the visual inspection, we will quote the cost to repair and will require approval prior to performing any work.

11. **Exclusive Offers:** Offers will be extended periodically throughout the year to all HCC members who provide us with their email address. If you decide to opt out of any email marketing message, you opt out of all email messages.

Fee Structure and Terms – March 13, 2013

\$8.00 per month charged to credit card on file (Annual \$96.00) + \$25.00 initial setup fee. Six (6) month minimum is required. You can cancel any time after the minimum service term by email or postal mailing to our office so that we know of your intentions by the 15th of the month. Monthly payments are non-refundable. Should changes to the program become necessary at any time we will give written notice sent by regular mail or email to your address on file at MPI.

Warranty Specifications, Disclaimers and Exclusions

HCC Membership does not extend or enhance the manufacturer's warranty: HCC Membership only extends the MPI warranty.

HCC Membership simply alters the standard MPI warranty by extending it: Otherwise, the standard MPI warranty and all of its specifications, disclaimers and exclusions continue to apply and are attached hereto.

Continuous Membership Required: Continuous Membership means that you are a current HCC member continuing to make monthly membership payments. Any extended warranty offered herein will cease if you cancel your membership or fail to insure that monthly payments are current. If you choose to discontinue membership, your warranties would revert to standard warranties.

Warranty on Repairs Made: Warranty extends only to the repairs made, not to the entire unit. For example, if the repair to a toilet requires a new flapper, then the warranty covers the flapper only, not the remaining components of the toilet. Our technicians will fix the present problem instead of recommending you replace everything "just in case". As such, we stand behind our work 100%, but can't warranty anything outside of our repair. Of course, if the repair was made to a fixture or equipment installed new and provided by MPI and it is still under warranty, that warranty continues. Consumables such as filters, batteries, etc. are excluded.

Warranty on New Heating and Air-Conditioning Installations: These extended warranties are valid only if seasonal tune-up maintenance is completed by MPI as required by the manufacturer on all units. Seasonal annual service includes changing of filters, oiling pumps, and draining expansion tanks, as well as cleaning and maintenance. Failure to perform this minimum general service can cause motor failure, heat exchanger failure, compressor failure, limit switch failure, excessive wear and tear to other components due to short cycling, and failures to other components which will not be covered by the MPI warranty. Our warranty does not cover consumables like filters and humidifier pads.

Warranty on Sewer & Drain Rodding: Sewer and drain rodding warranty is increased from 30 days to 90 days from date of rodding, which includes one free call back rodding if necessary within 90 days. Not all sewer stoppages can be remedied via rodding. Any subsequent rodding and televising necessary to determine a planned solution will be charged at HCC rates. Broken sewer lines are excluded. Flushing anything other than toilet paper and human waste down the toilet will void the warranty. Items such as, paper towels, napkins, baby wipes, tampons, dental floss, prophylactics, q-tips, expired pets, etc. should never be flushed down the toilet. The warranty on interior drain line rodding requires customer help. We'll open the drain, but we will not warranty the rodding if non-drain friendly items are put down the drain. For kitchen sinks, that's things like grease and excessive amounts of food.

Warranty on Sump and Ejector Pumps: Warranty on pumps excludes pump failure due to the pump or pump switch being jammed with debris such as paper towels, napkins, baby wipes, tampons, dental floss, prophylactics, q-tips, expired pets, or anything other than human waste and a normal amount of toilet paper.

Warranty on Frozen Pipes: Once we get the water flowing, we can't warranty against pipes re-freezing. Once thawed, the occupant will have to keep the affected area out of trouble by keeping the heat high, insulating that section of the house, opening cabinet doors or taking other preventive and proactive measures to solve the underlying problem. While we'd love to say we can promise Mother Nature will not be cruel enough to freeze your pipes twice, we simply can't. We will be happy to consult with you on a more permanent solution to the freezing problem and refer you to other tradesmen who may be needed to attempt to solve the problem.

Lapsed or Cancelled HCC Membership: If your membership lapses for any reason because of unpaid monthly fees, or if you cancel your membership, a new \$25 set up fee and a new minimum 6 month commitment to the program will be required. Your warranties and discounts will then start over, after any necessary repairs or corrections have been made, from your new membership date. We will also conduct a new home audit if the initial audit was conducted more than 3 years prior to reinstatement.

HCC Discounts on Nights and Weekends: When our technicians are dispatched from the office during normal work hours, you will be identified to them as an HCC Member and your discounts will be applied at the time of service. At night or on weekends, however, our technicians will not have access to our member database. We ask that you pay them at the time of service at the regular rate. Please know that credit cards and checks are not processed until the next normal business day. In the daytime, our staff in the office will confirm your status and process payments only for the appropriate amount giving you all the discounts you are entitled to. If you pay the technician by check, we will issue you a refund for any overpayments.

* Not applicable to electrical services or repairs.
